

Have you got the 'Cover-Blues?

Edward W. Hoyt (#292)

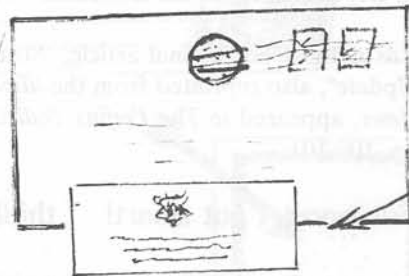

Using covers in an Exhibit gives you a 75 percent boost. There are many covers which we would like to use, but the "corner card" is on the back.

You will find this to be true with many foreign covers -- especially Danish.

All you have to do is photocopy the back of the cover the back of the cover. But, first -- the darker the cover, the lighter you have to set the photocopying machine. Trim the "corner card" out and mount it with your cover as shown on the back page. A slightly moistened hinge will hold the corner card in place and will not mar the cover.
